		<ul style="list-style-type: none"> <li>• The most reliable HID latching relay on the market</li> <li>• Suitable for all types of loads including capacitor corrected HID ballasts</li> <li>• Manual operation lever and indicator are built-in for convenient operation and status check at the panel</li> <li>• Auxiliary contact included on some models</li> </ul>	<p>Control Input</p> <ul style="list-style-type: none"> <li>• Class 2 circuit.</li> <li>• 0.350A (350mA).</li> <li>• 24V reversible polarity pulse</li> <li>• Input terminals: #16 - #20AWG</li> <li>• Output terminals: #10 - #14AWG</li> </ul> <p>Output Contact Ratings</p> <ul style="list-style-type: none"> <li>• More than 30,000 operations with 20A load, 2000A inrush @20 times / min. switch speed</li> </ul> <p>WR-6161 Listings</p> <p>UL</p> <ul style="list-style-type: none"> <li>30A 300Vac General Use</li> <li>2400W 120Vac Tungsten</li> <li>20A 300 Vac Standard Ballast</li> <li>16A 277Vac Electronic Ballast</li> <li>1/2HP at 110-125Vac</li> <li>1-1/2HP at 220-277Vac</li> <li>SCCR 18,000A 277Vac</li> </ul> <p>CSA</p> <ul style="list-style-type: none"> <li>347Vac General Use</li> <li>2400W 120Vac Tungsten</li> <li>20A 347Vac Ballast</li> </ul> <p>WR-6172 Listings</p> <p>UL</p> <ul style="list-style-type: none"> <li>20A 480Vac General Use</li> <li>2400W 120Vac Tungsten</li> <li>20A 480Vac Ballast</li> </ul> <p>CSA</p> <ul style="list-style-type: none"> <li>20A 347Vac General Use</li> <li>2400W 120Vac Tungsten</li> <li>20A 347Vac Ballast</li> </ul>
	WR-6161	1-pole HID relay 30A: 120/277/300/347Vac	
	WR-6161-382	1-pole HID relay (auxiliary contact) 20A: 120/277/300/347Vac Auxiliary contact: 1A, 125Vac	
	WR-6172	2-pole HID relay 20A: 120/277/347/480Vac	
	WR-6172-382	2-pole HID relay (auxiliary contact) 20A: 120/277/347/480Vac Auxiliary contacts: 1A, 125Vac	<p>Environment</p> <ul style="list-style-type: none"> <li>• Indoors, stationary, non-vibrating, non-corrosive atmosphere and non-condensing humidity</li> <li>• Ambient temperature: 15°F to 120°F (-10°C to +50°C)</li> </ul> <p>Note: 2-pole relay (WR-6172) has the same input ratings as the 1-pole relay. Use this feature to double the load switching capacity of a low voltage switch.</p>

DIMENSIONS & MOUNTING

WR-6100 series relays mount to a snap rail built into Douglas PWEx series relay panels.

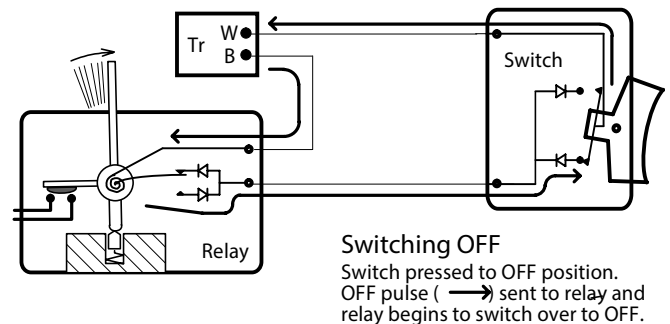

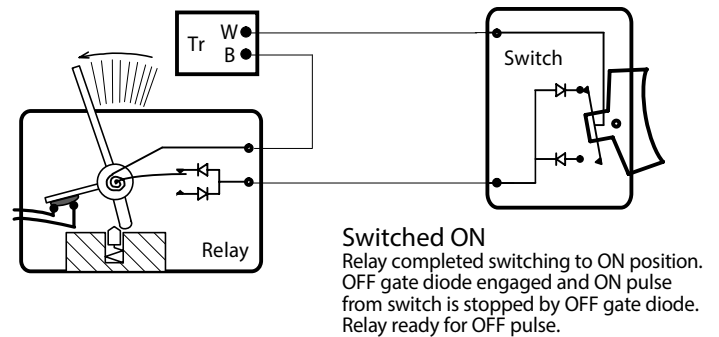

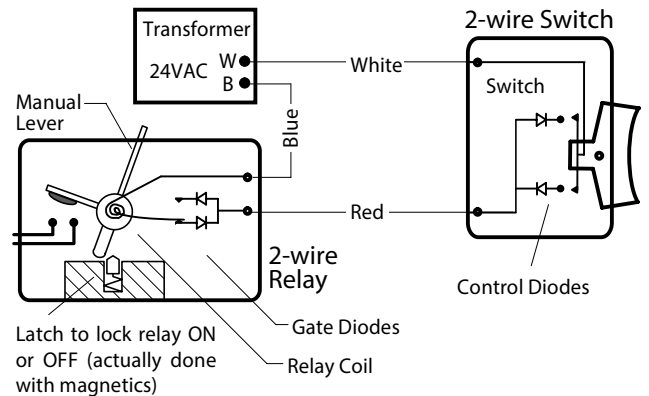

2-WIRE RELAY TECHNOLOGY

- Douglas 2-wire relays utilize an ingenious control method that permits simple and minimal wiring. All functions for low voltage control: on, off, indication and location are provided with only a 2-wire connection of which one is often a common. All Douglas relays manufactured over the past 30 years utilize the same principle. Thus, any Douglas switching device is compatible with any model of Douglas relay.

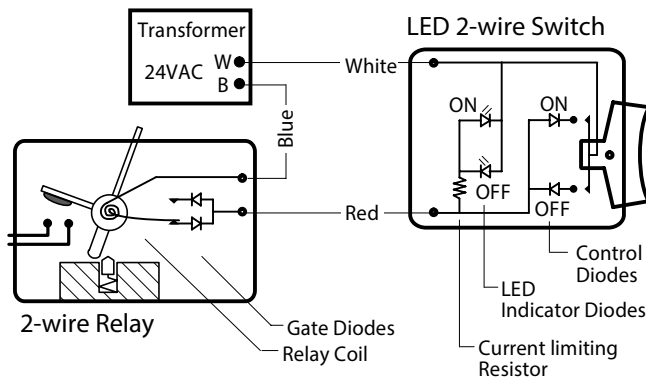

Operational Principle

- A negative pulse turns the relay ON and a positive pulse turns it OFF. Using a diode, an AC signal can be rectified to turn the relay either ON or OFF. Douglas switches have 2 diodes built into the switch to provide the ON and OFF signals.
- The relay has 2 similar diodes built inside that are in series with the relay coil. The diodes in the relay act as gates for the switch signal.
- To turn the relay ON or OFF, the rocker switch completes the circuit by selecting the ON or OFF diode. If the diode selected is in the same direction as the gate diode in the relay, the relay will switch. If the gate diode is not in the correct direction, then nothing will happen since the relay is already in the correct state for the action selected by the switch. When the switch is released, a spring returns it to the central neutral position
- Indication (ON state) and location (OFF state) are obtained by utilizing LED diodes built into the switch. Only the LED which is connected in the same direction as the gate diode in the relay will light. Although the LED current passes through the relay coil, it is not large enough to cause the relay to trip. However, there is a limit: the maximum number of LED switches that can be connected to the same relay is 6
- For additional convenience (especially during installation) all standard models have a manual control lever and indicator permitting a non-electrical method of switching and status check at the panel.

Detailed 2-wire Relay / Switch Circuit

Detailed LED Switch Circuit \*

\* LED Switch circuit actually not as shown. Switch is functionally similar except rocker switch is replaced with single push button.
